

Safe Storage Solutions

U.S. Chemical Storage designs and manufactures the strongest line of secondary containment buildings to meet EPA, OSHA and NFPA requirements. Building codes and other compliance goals and regulations can also be fulfilled by implementing proper hazmat storage. Each building is FM and Warnock-Hersey Approved, and each is covered by a 15 year structural warranty—the longest warranty in the industry.

These compliant buildings are completely customized, allowing our clients in the Pharmaceutical, Biological and Chemical industries the freedom to design a building to their specific needs. Non Fire Rated, 2 Hour Fire Rated and 4 Hour Fire Rated constructions are available to allow locations as close as inside a facility. A complete line of electrical, personal safety and structural accessories are available to format a building for almost any desired function.

- Bulk Storage for Totes and Drums
- Testing Rooms
- Mixing/Dispensing Rooms
- Pump Rooms
- Equipment Housing

Advantages of Utilizing U.S. Chemical Storage Buildings:

- The strongest, most durable storage solution available
